

Temiloluwa Daniel Adebayo

Full-Stack Software Engineer, AI-Integrated Systems: Web, Mobile & Desktop

Ogun State, Nigeria | +234 812 312 1554 (WhatsApp) | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Final-year Computer Software Engineering student (Chrisland University, expected October 2026, CGPA 4.47/5.0, specialisation in AI and Machine Learning) with over three years of professional software engineering experience across freelance, agency, and founding-engineer roles. Has independently designed and shipped 14 production systems across web, mobile, and desktop platforms, including systems in active commercial use: a multi-tenant fintech platform used by five hospital cooperatives, a government payroll distribution tool verified at over 8,000 employees, and multiple applications published on the Microsoft Store, Google Play, and Apple App Store. Comfortable working solo across the full stack, from database architecture and backend automation through to production-ready frontend and mobile interfaces, and equally effective directing small cross-functional teams. EC-Council Certified Ethical Hacker.

CORE SKILLS

- **Languages:** JavaScript, TypeScript, Python, Dart, SQL, HTML/CSS
- **Frontend & Mobile:** React, Next.js 14/15, React Native, Flutter, Tailwind CSS, Framer Motion
- **Desktop:** Electron, MSIX Packaging, Microsoft Store APIs, WinRT
- **Backend & Data:** Node.js, Express, FastAPI, Supabase, PostgreSQL, SQLite
- **Automation & AI:** n8n, webhook-based workflow design, OpenAI GPT-4o API, prompt engineering
- **Payments & Distribution:** Stripe, Microsoft Store Subscriptions, Google Play Billing, RevenueCat
- **Security:** Row-Level Security (RLS), RBAC, multi-tenant data isolation, Supabase Auth
- **DevOps:** Git, Vercel, Railway, Docker

PROFESSIONAL EXPERIENCE

Founding Engineer & Project Lead

Dec 2025 – Present

VooltGroup Limited | Remote, United Kingdom | Part-time, ~12 hrs/week

- Sole engineer and project lead directing a small cross-functional team of graphic designers and automation specialists; independently designed, built, and shipped every production system listed below.
- Architected and deployed six production systems end-to-end: LeadForge, VooltFlow, VOOLT Academy, VooltTrip, NEXA, and Voolt.
- LeadForge: n8n-based outbound sales automation pipeline designed to handle up to 4,000 leads/day, covering discovery, quality scoring, personalised PDF proposal generation, and cold email delivery with no manual steps.
- VooltFlow: AI affiliate automation that searches three marketplaces in parallel, filters by quality, matches trending video content, and publishes GPT-4o-written WooCommerce listings in under 60 seconds.
- Stack: Next.js 14/15, React 19, TypeScript, Supabase, PostgreSQL, n8n, OpenAI GPT-4o, Tailwind CSS, Vercel.

Solo Software Engineer, Mobile & Desktop Developer

Sep 2025 – Feb 2026

Flix Technologies | Remote, Canada | Full-time, 30 hrs/week

- Solo-developed and deployed multiple commercial desktop and mobile applications, independently responsible for the full engineering lifecycle from architecture through to store submission.
- Built and shipped EyeBalance, a Stripe-monetised Windows desktop visual therapy application (Electron, Express, SQLite, Railway), and its companion EyeBalance Mobile (Flutter, Google Play).
- Built Faithloom (Windows content app, Microsoft Store MSIX), Playback (Flutter Android game hub with 7 built games, Google Play), and CalcPro (Windows freemium calculator, Microsoft Store certified).
- Hands-on experience with Stripe Checkout and Webhooks, Microsoft Store APIs (WinRT, MSIX), Google Play Billing, and RevenueCat. Products are subject to NDA; further detail available on request.

ML Software Engineer & Application Developer, Freelance

Oct 2025 – Present

Dot's Institute of Technology | Remote

- Retained on a freelance basis following the internship below, based on performance.
- Built a payslip automation tool for a government hospital client, matching and dispatching payslip PDFs to staff; verified at a peak of 8,370 employees, replacing manual weeks-long distribution with same-day automated dispatch.
- Built PayHub Central, a hardened multi-tenant fintech platform for hospital cooperatives, now in active use across 5 cooperatives; 3 isolation levels, 9 user roles, Row-Level Security enforced on every table.
- Built ExamForge CBT, an offline-first desktop exam system (Electron, React, SQLite, Supabase) with isolated student and admin applications and automatic cloud sync on reconnect.

AI/ML Engineer, Data Analysis, Internship

May 2025 – Oct 2025

Dot's Institute of Technology | Abeokuta, Nigeria | On-site, 30 hrs/week

- Completed a structured internship in AI/ML and data analysis; performance during this period led directly to the retained freelance engagement above.

Full-Stack Software Developer & Project Manager

Apr 2023 – Jul 2025

Orayn Digital Agency | Remote | Full-time, 30 hrs/week

- Built and managed delivery of 7 automation systems and 2 mobile applications published on the Apple App Store. Specific details restricted under NDA; available on request within contractual limits.

KEY PROJECTS

LeadForge (Next.js 14, n8n, Supabase, ScrapingBee, Gmail API)

9-phase automated outbound sales engine: lead discovery, quality scoring, personalised PDF proposal generation, and cold email delivery, designed to run with zero manual steps.

PayHub Central (Next.js, Supabase, PostgreSQL, RBAC, Row-Level Security)

Hardened multi-tenant fintech platform for hospital cooperatives, in active use across 5 cooperatives. 3 isolation levels, 9 user roles, RLS on every table, cross-cooperative loan risk transparency to prevent salary-deduction overflow.

VooltFlow (Next.js 15, GPT-4o, n8n, WooCommerce API, Supabase)

AI affiliate automation platform: searches three marketplaces in parallel, applies quality filters, generates affiliate links, matches trending video content, and publishes AI-written listings in under 60 seconds.

ExamForge CBT (Electron, React, SQLite, Supabase)

Offline-first desktop examination system with isolated student and administrator applications. Runs entirely offline during exams and auto-syncs submissions to Supabase on reconnect.

EyeBalance Desktop (Electron, Express, SQLite, Stripe, Railway)

Stripe-monetised Windows desktop visual therapy application, published and publicly available on the Microsoft Store.

CERTIFICATIONS

Certified Ethical Hacker (CEH), EC-Council

Issued 11 August 2026 | Certification No. ECC4218065937

Certification scope: footprinting and reconnaissance, network scanning, vulnerability analysis, system hacking, web application and SQL injection attacks, cryptography and hash analysis, social engineering awareness, and denial-of-service concepts.

EDUCATION

BSc Computer Software Engineering

Chrisland University, Nigeria

Nov 2022 – Expected Oct 2026 | CGPA: 4.47/5.0 | Specialisation: AI & Machine Learning

LANGUAGES

English (Fluent) · French (Intermediate)

AVAILABILITY

Immediate | Remote, Contract, or Full-Time | Open to relocation discussions
